Dear Henry Tan,

I had the opportunity to attend your previous conference on energy in Inverness in Scotland. It was a great meeting which brought people from all over the world together to discuss energy related issues in a broader context. The right mixture of plenary and parallel sessions allowed to broaden and to deepen one's own field of interest. Social activities helped to initiate vivid discussions among participants of all kind of different disciplines.

In the meantime, I wrote a book about the issues I discussed in my presentation from last year and I can say that I profited a lot from the discussions at your conference. If time allows it, I will be happy to participate in your conference in Manchester. It is so important nowadays to have high level scientific discussions on energy issues across disciplines, cultures and nations.

Best regards
